

Process Machine Replacement

Printing & Packaging Industries

This Client is a leading printing and packaging manufacturer in Egypt. It serves large multinational companies across the Middle East through their range of food and beverage packing products. The company produces paper cups for hot and cold as well as all ice-cream packages in their different shapes and sizes.

The Company replaced three old packaging production lines with modern equipment to reduce the energy costs. The new machines achieved the desired financial savings and remarkably increased production by 210%.
